(54) Title: SYSTEM AND METHOD FOR SENSING IN-VIVO STRESS AND PRESSURE

(57) Abstract: A device (4440), system and method may sense and/or analyze in-vivo pressure or stress, and may in addition sense other data, such as for example, image data. An in-vivo device (4440) may include a stress or pressure sensor (4443), and possibly an additional sensor, such as an image sensor, a pH sensor, etc. In one example the stress or pressure sensor (4443) is connected to a shell (4444) of the device.
